# Prevents Rickets

**F**ROM the time S. M. A. was developed in 1913, the idea of rickets prevention has been included by incorporating into the S. M. A. fat an adequate amount of cod liver oil. The quantity and quality of the food constituents and their correlation in S. M. A. also play a role in the prevention of rickets and spasmophilia.

This, with the many other sound

Protein S. M. A. (Acidulated) is indicated for diarrhea and malnutrition and for marasmic (athreptic), premature and other infants requiring a high protein intake.

*We invite you to try S. M. A. and Protein S. M. A. (Acidulated) in your own practice. Literature and a trial package sent upon request.*

nutritional principles embodied in S. M. A., is responsible for the excellent nutritional results obtained in most cases in feeding infants deprived of breast milk.

When breast milk is not available, or as a supplement to breast milk, S.M.A. may be prescribed as an able substitute for feeding normal, full term infants, or in milder cases of malnutrition.

## The "Master" Elastic Stocking

Insist upon Pomeroy Quality—  
It costs no more.

Different from the ordinary for each is woven to measure by skilled and experienced workmen. Made in our own factory—even to the winding of the rubber—you are assured of a perfect fit and firm even pressure. Hand woven, not machine made.

A wide choice in weight, also our especially light weight stocking which can be made up in a color that will not show through thin silk hose.
